Job Description

Have the opportunity to work for a software product firm in New York City working as a Technical Product Manager on the Messaging Middleware team. You will be the Technical Product Manager working on critical systems to develop and execute strategies, evaluate risk, track P&L, and lead sales teams. The constant challenge is the complexity of integrating these systems so that data moves correctly across the enterprise, at higher speeds and lower costs. Building solutions in-house can take a large team and a larger investment. Integrators and consultants may not understand a firm's business model or data. That's where this team comes in.

Working on the Messaging Middleware team you will drive the Product Strategy and Roadmapping of Connectivity and Integration Services products, helping firms run that complexity. You will provide common tools, services and expertise, that enables firms to simplify technology relationships, which ultimately drive lower total cost of ownership (TCO), faster time to market (TTM) and improved transparency. With this team's track record in delivering hosted solutions and their understanding of their customers' needs, the team believes they are uniquely positioned to help clients with this challenge.

What's the role?

The Messaging Middleware team provides Connectivity & Integration Solutions and is responsible for the development and deployment of the global enterprise integration capabilities within this software product firm. The Messaging Middleware team is enjoying an exciting period of growth and is currently seeking a senior-level technical Software Product Management professional to join the team based in New York City. As part of this dynamic team, you will be responsible for the firm's Connectivity & Integration Solutions, driving Real-time Enterprise Workflows strategy, execution and go-to-market (GTM). Areas of product specialization include Messaging / System Integration and Software Development of high-scale, Cloud solutions based on Real-Time Messaging technology. This position will involve direct Senior Management interaction, defining business and technical standards across multiple business lines and defining developmental plans, priorities and budgets.

We'll Trust You To (Responsibilities):

You will own the development and growth of the firm's Real-time Enterprise Workflows Products which support the firm's global enterprise clients. You will extend and crystallize the Product vision, collaborate with Product Designers and Engineering to execute on this vision

while planning a Go-to-Market strategy to launch creative features on a predictable and regular basis. Your work will have a direct impact on the group's P&L. This job requires a shown skill-set encompassing technology, communication and project management.

You'll Need To Have (Required Skills):

- 7+ years of experience working within a Product Management role where you were involved with:
- Strategy
- Roadmap
- Collaboration with Product and Engineering to define target-state architectures
- Working with Design and UX
- Client-experience
- Go-to-Market Strategy
- Impeccable written and interpersonal skills
- Ability to present to technical and business audience, including senior management
- A strong sense of ownership
- Successfully shipped cloud software (i.e. Kubernetes, Dockers) with a technology vendor or technology-focused financial institution
- Ability to clearly articulate ideas and garner support for your initiatives
- Extraordinary Project Management skills for Lean/Agile Software Development
- Previous Software Engineering background or equivalent technical experience is strongly preferred
- The firm's technology stack includes Scala, C/C++, Kafka, Cassandra, PostgreSQL, Camel, NGNIX and RESTful APIs

You'll also be an authority in the following areas:

- Lean/Agile Software Development Lifecycle plus JIRA
- Experience working with User Experience Designers, Visual Designers and Software Engineers
- Knowledge of messaging systems for like IBM MQ, TIBCO, MSMQ, Sonic, and JMS
- Proficiency with Microsoft Excel, Word and PowerPoint
